

DIGITAL FORENSICS

In an increasingly digital and connected world, digital forensics becomes an essential aspect of litigation. Digital forensics is the investigation and recovery of information from computers, phones, and other storage server media.

DIGITAL FORENSICS EXAMINER

Legal Eagle offers digital forensic services in the way of a digital forensic examiner. Our forensics expert may find crucial information on:

- disc drives
- mobile phones
- hosted servers
- email servers
- cloud servers
- ram memory chips
- voicemail
- text messaging
- camera memory cards

DISCOVERABLE

Evidence found using digital forensics is typically discoverable and authenticated for presentation to the jury in South Carolina state and federal courts.

REQUIRED EXPERTISE

The digital forensics examiners works within the framework of court rules to identify, recover, preserve, analyze, and report forensic determinations for use by an attorney in litigation.

Tim Thames
eDiscovery Director

Tim is a veteran of providing legal services and brings more than 28 years of hands-on litigation experience to the table, along with 14 years of concentrated eDiscovery knowledge. He leads eDiscovery efforts at Legal Eagle, from preservation of data, forensic collections, analysis, electronic database management, and consulting services.

“Our office has utilized the services of Legal Eagles for nine years. The level of communication, accuracy and willingness to accommodate our needs has been integral in our decision to continue doing business with Legal Eagle. The staff has always been courteous, friendly, and ready to the extra mile. The quality of work is consistently thorough and top notch.”
